

**CITRIC ACID**

**TECH GRADE**

**GTI**

**Environmentally  
Friendly Cleaning  
Agent**

## **PRODUCT DATA SHEET**

### **RELEVANT IDENTIFIED USES**

Citric Acid can be used in food as food additives and also in technical application as clarifying agent, water softener, buffer, foam booster, and stabilizer complexing agent and as an intermediate in production of organic chemicals.

The conjugate base of citric acid occurs in the metabolism of virtually every living thing. At room temperature, citric acid is a white crystalline powder. It is used in a wide variety of industries including cleaning, dyeing, cosmetics, biology, pharmaceuticals, foods, beverages, personal care, industrial, construction, and even photography.

Citric acid can also be used as an environmentally-friendly cleaning agent. Use caution when dealing with citric acid because it may cause severe irritation to the skin including minor skin burns.

50% Tech Grade Available in 50 lb Granular or 55 Gallon liquid. Also available in 10% dilute 55 Gallon drum.
