

**GT DESCALER**

**WATER SCALE  
SOLVENT**

**GTi**

**DISSOLVES LIME  
SCALE AND CALCIUM  
DEPOSITS**

## **PRODUCT DATA SHEET**

### **POWER ► PAPER ► PULP INDUSTRY**

- GT Descaler is a biodegradable descaler safe for cleaning the water side of equipment.
- Removes scale and corrosion deposits without equipment disassembly.
- Extends equipment life, reduces bearing failures, increases vacuum, and restores heat transfer surfaces. Cleans to bare steel in less than 3 hours.
- GT Descaler should be circulated through equipment being cleaned: CO<sub>2</sub> will emit with the dissolution of scale; equipment must be vented at all times to allow gas to escape.

### **WHERE NOT TO USE**

Aluminum, aluminum alloys, zinc, or alloys of magnesium.

### **KEY APPLICATIONS**

- Air Compressor Coolers
- Heat Exchangers
- Lube Oil Coolers
- Vacuum Pumps
- Mill Rolls
- Scrubbers
- Slurry Lines
- Ash Lines
- Turbine Legs

### **DISSOLVES**

Water Scale, Lime Deposits, Calcium Carbonate, Iron Oxide, Rust/Corrosion, Ash, Liquor.

### **PHYSICAL PROPERTIES**

- Appearance                      Yellow to light amber
- Specific Gravity                  1.04
- Odor                                  Slight acidic
- pH                                      <1
- Solubility in Water                Complete
